

Chicken eggs takes 21 days to hatch. There home is a incubator, which keeps the air warm and moist. Using a sharp “egg tooth” on its beak, each chick starts to “pip” (peck) the inner shell membrane on day 19. The chick breaths air in side the shell and makes it’s lungs stronger. in the next two days, the chick will pip the outer shell thousand’s of times. Finally, the shell will brake completely, leting the chick out.
